

COMPAMED

November 13-16, 2023, Messe Düsseldorf, Hall 8A, Booth J31

FESTO

In totally safe and reliable hands!

Festo automates your gas and liquid handling on an individual basis. This allows you to concentrate fully on innovations in pharmaceuticals, laboratory automation, in vitro diagnostics as well as your medical devices.

Be inspired.

EXCL

customizable 3D gantry
with two independent Z-axes

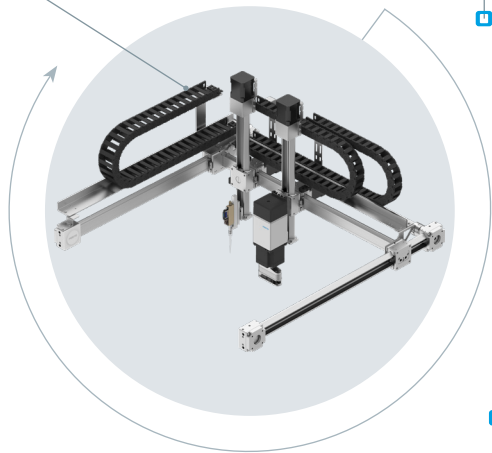

VYKA

media-separated solenoid valve
with only 7 mm width and large
nominal width of 1.2 mm

VEMD

mass flow controller with
up to 200 l/min at high dynamics

Festo offers components and subsystems for automating your laboratory and medical equipment that work together precisely. Including expert support in all project phases.

- **Grip, open and position samples securely**

Laboratory automation from Festo brings speed to your applications – for optimum processes and high throughput.

[Our highlight: 3D gantry EXCL.](#)

- **Precise dosing of liquids**

Liquid handling: high-quality components and flexible subsystems for sample preparation.

[Our highlight: media separated solenoid valves VYKA, VYKB and VYKC.](#)

- **Controlling medical gases**

Precision, safety and maximum efficiency: modern valve technology helps to save the lives of many patients.

[Our highlight: mass flow controller VEMD.](#)
