

Portable Learning Systems

Suitcase Smarts: Small Size, Big Learning

FESTO

Are you facing challenges like remote learning needs, limited lab space, or budget constraints? Training systems housed in suitcases offer a practical solution in a compact format without compromising on educational value.

Discover our selection of learning suitcases that combine convenience and quality!

Portable Learning Systems

Suitcase Smarts: Small Size, Big Learning

Electrotechnology

Basic Motor Controls

TP1221-P conveys the fundamentals of industrial electric motor control technology and how to install, test, and troubleshoot the most common motor controllers.

- To the product page
- To the Festo LX course

Variable-Frequency Drives

LV3356 introduces students to motor drives, VFD operation with basic and advanced control functions, load types and control methods, and troubleshooting.

- To the product page
- To the Festo LX course

AC/DC Fundamentals

LV3351 includes a range of common electrical components in AC and DC electrical circuits to introduce students to all the essential concepts of electricity.

- To the product page
- To the Festo LX course

Industrial Mechanics

Exploring Mechanisms

LV3342-A introduces students to the world of mechanical power transmission by the study of basic principles and simple machines.

- To the product page

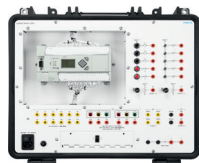

Programmable Logic Controllers

Advanced PLC Programming

LV3355 enables students to grasp PLC operation and addressing, and to program in four languages. With a Siemens S7-1200 or an Allen-Bradley CompactLogix.

- To the product page
- To the Festo LX course

Allen-Bradley MicroLogix 1400

LV3240-E helps students learn to operate, program, and troubleshoot a basic PLC-controlled system.

- To the product page
- To the Festo LX course

Fluid Power

Pneumatics

TP 101 America fosters essential knowledge of basic pneumatic systems.

- To the product page
- To the Festo LX course

Electropneumatics

TP 201 America builds on TP 101 to convey the fundamentals of electropneumatics.
