

9 – 12 April 2024, Messe München, Hall B2, Stand 507 and 510

analytica

FESTO

Simply in good hands!

Festo takes an individual approach to your sample and liquid handling requirements. That gives you the freedom to focus completely on developing innovations for your devices in analytics, laboratory automation and in-vitro diagnostics.

Be inspired.

EXCL

Customizable 3D gantry with two independent Z-axes

VYKC, VYKA

Media-separated solenoid valves with different nominal widths up to 2 mm

VOVK

Smallest switching valve with a width of 5.9 mm

EHMD-50

Decapping sample vials

Festo offers components and subsystems for automating your laboratory and medical equipment that work together seamlessly. This includes expert support in every phase of the project.

- **Reliably gripping, opening and positioning samples**

Laboratory automation from Festo speeds up your applications, ensuring optimum processes and high throughput.

[Our highlight: the EXCL 3D gantry and decapper EHMD](#)

- **Precisely dosing liquids**

Liquid handling: high-quality components and flexible subsystems for transferring liquids.

[Our highlight: the media-separated solenoid valves VYKA, VYKB and VYKC](#)

- **Automating in-vitro diagnostics**

Save space in your applications by using miniature valves, suitable for large systems (total lab automation) as well as small table-top devices (point-of-care).
