

Pressure sensor SDE5

FESTO

Characteristics

At a glance

The pressure sensor SDE5 is the cost-effective alternative for quick and easy pressure monitoring. This smart component instantly provides information about the actual pressure and is an equally effective device for object detection as it is for compressed air, regulation and vacuum detection. It can be used wherever simple sensing of the actual pressure is required:

- Compressed air monitoring
- Regulator monitoring
- Confirmation of suction in vacuum technology
- Object detection via back pressure
- Selectable output functions
- Teach-in function for programming
- Very short mounting times thanks to QS connections and wall brackets that can be linked
- Very quick switching-point adjustment by simply pressing a button
- Switching status indicated by an LED visible from all sides
- Relative pressure or differential pressure measurement
- 5 Pressure measuring ranges: 0 ... -1 bar, -1 ... 1 bar, 0 ... 2 bar, 0 ... 6 bar, 0 ... 10 bar
- Analogue output: 0 ... 10 V
- Electrical outputs: 1 switching output PNP or NPN

Festo Core Range

Solves the majority of your automation tasks

With the Festo Core Range, we have selected the most important products and functions from our broad product catalogue, and added the quickest delivery. the Core Range offers you the best value with the expected high Festo quality.

- Quickest delivery, worldwide – wherever, whenever
- Expected high Festo quality
- Easy and fast to select
