Smartenance –
keeps maintenance simple!

FESTO

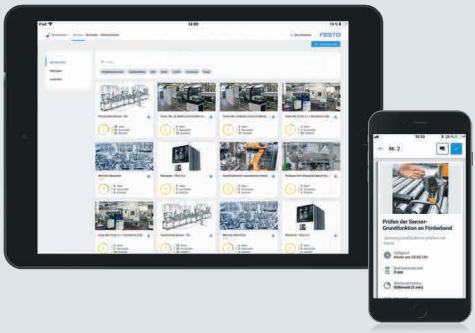

Smartenance lets you schedule autonomous maintenance tasks, report faults on the move and document your measures. Use the Smartenance app on your smartphone and tablet to perform maintenance tasks on the machine, and the Smartenance web app to manage the tasks on a PC.

All functions
in one app:

- Autonomous maintenance
- Incident management
- Machine logbook
- Interface (REST API)

* With 5 licences for 25 machines.

Smartenance app – always on hand

The mobile app gives you access to maintenance plans and attachments wherever you are.

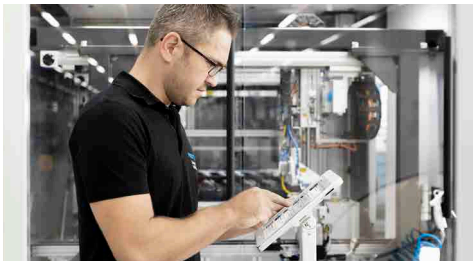

For machine operators
On the shop floor, the Smartenance app offers access to the maintenance plan. It provides you with the maintenance tasks in digital format. You have access to images, PDFs and videos at your fingertips and can add feedback about maintenance tasks. In the event of a incident, you can create a ticket directly on the spot.

Available for Android and iOS
- Register at www.festo.com/smartenance-trial
- Download the Smartenance app in the Google Play or Apple App Store.
- Create a new device access in your Smartenance web application.
- Scan the QR code using the Smartenance app to connect to your account.

The benefits to you:
- The maintenance task is sent to you as the user
- You waste no time looking for tasks and documents
- Intuitive and easy-to-use app

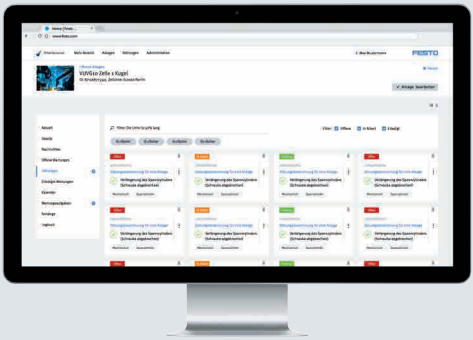

Download on the App Store

GET IT ON Google Play

Smartenance web application – everything in sight

The web application gives you an overview of all maintenance activities and lets you manage incident tickets.

For production managers
You can use the web application conveniently in the office. This is where you create and manage the autonomous maintenance tasks, check the maintenance status of your machines and view feedback from your colleagues. You can link Smartenance to other systems or initiate automated maintenance tasks via the interface. With the machine logbook you are perfectly prepared for audits.

The benefits to you:
- Overview of maintenance from your office
- No need to print out, distribute or collect lists and documents
- Machine logbook for audits

For maintenance personnel
With the web application you can work on a PC or on the move on a tablet. You can view, assign and respond to current incident reports. The intelligent logbook allows you to search efficiently for similar incidents, so that you can build on existing knowledge and rectify specific problems efficiently. Images, PDFs and videos make it much faster to share knowledge.

The benefits to you:
- Fast access to incident reports
- Learn from existing knowledge
- Well prepared to deal with the machine
